

SHRISHTI SINGH

AI Engineer Intern · Product Builder · B.Tech CSE + IIT Ropar AI Minor
+91-8169030656 · shrishtis089@gmail.com · github.com/shru089 · LinkedIn

3rd-year B.Tech CSE student with an AI Minor from IIT Ropar, actively building and shipping AI-powered products using Python, FastAPI, LangChain, and LLM APIs (Gemini, Claude, OpenAI). Experienced in rapid prototyping of chatbots, workflow automations, and agentic pipelines — with 4 deployed applications and 3 hackathon prizes. Eager to experiment with Gen-AI and Agentic tools to accelerate real post-sales workflows across implementation, support, and customer success operations.

TECHNICAL SKILLS

AI / Gen-AI	LangChain, LlamaIndex, RAG Pipelines, OpenAI API, Gemini API, Claude API, Prompt Engineering, Agentic workflows
Python	FastAPI, Flask, Pydantic, SQLAlchemy, Pandas, NumPy, Jupyter Notebooks, REST API development
Automation	Playwright (web automation), Watchdog (file events), Telegram/WhatsApp bots, GitHub Actions CI/CD, Docker
Data & APIs	JSON, SQL, SQLite, PostgreSQL, MongoDB, API integration, data preprocessing, Recharts analytics
Frontend	React, TypeScript, TailwindCSS, PWA / Service Workers, Framer Motion
Tools	Git, GitHub, VS Code, Postman, Jupyter, Vercel, Railway, Render, Google Cloud, Firebase

AI PROJECTS & PROTOTYPES

StriveX — AI Productivity Decision Engine | *Flask · React · Gemini API · LangChain · PostgreSQL · Docker*

- ▶ Built and deployed a **Gemini 1.5 Flash agentic pipeline** for NLP goal parsing, daily brief generation, and adaptive task coaching — with multi-key rotation, in-memory TTL cache, and rule-based fallback engine
- ▶ Prototyped a **Behavioral Intelligence Engine** that analyzes 30-day user behavior logs to surface procrastination patterns and burnout signals — feeding actionable AI coaching insights to users
- ▶ Shipped 40+ REST API endpoints with production-grade security (JWT, bcrypt, HMAC webhooks, rate limiting) and documented via Swagger/OpenAPI — exactly the kind of internal tooling Zycus Delivery teams use
- ▶ Implemented Stripe subscription billing with webhook validation + Sentry monitoring — end-to-end pilot with real feedback loop

Intern India — AI Smart Allocation Engine | *FastAPI · React · Gemini · Sentence-Transformers · MongoDB · Playwright* 🏆 **3rd Prize**

- ▶ Automated the entire internship matching workflow: **Playwright scrapers** → **Gemini resume parsing** → **MiniLM semantic similarity** → **Hungarian algorithm allocation** — end-to-end agentic pipeline replacing a manual process
- ▶ Integrated **Telegram and WhatsApp bot alerts** for real-time notifications to candidates — direct analogue to customer success automation workflows
- ▶ Built drag-and-drop Kanban tracker for operators to manage allocation status — prototype deployed and tested with real users

Lex India — AI Legal Assistance Platform | *FastAPI · React · Qdrant · RAG · NLP* 🏆 **1st Prize origin (Formar Nyaya AI)**

- ▶ Built an **NLP chatbot for legal query simplification** using extractive summarization and structured response generation — directly comparable to support chatbot use cases
- ▶ Designed full **RAG pipeline (LlamaIndex-style) over Indian court judgment corpus** with Qdrant vector similarity search — retrieves relevant case precedents in under 3 seconds
- ▶ Wrote complete PRD including AI accuracy thresholds, confidence scoring, user feedback loops, and audit mechanisms — documentation and knowledge transfer ready

SABINAC — Local PC Agentic Intelligence | *Python · Groq API · Playwright · mem0 · SQLite · Watchdog* **In Development**

- ▶ Designing an **8-layer autonomous agent** that monitors filesystem events, runs background browser automation via Playwright, and executes OS-level tasks — while the user stays in their primary workflow
- ▶ Implemented **3-tier memory (mem0 + SQLite)**, prompt injection sanitization, SHA-256 audit log chain, and behavioral state inference (FLOW / STUCK / AWAY) — production-grade agentic safety design
- ▶ Rule-based cerebellum classifier handles 80% of tasks with zero API cost; Groq Llama 3.1 70B cortex handles complex reasoning — cost-optimized hybrid like enterprise AI deployments

Katha — Cultural AI Storyteller | *FastAPI · React · ElevenLabs TTS · Pollinations.ai · Docker* **Shipped in 3 weeks**

- ▶ Rapidly prototyped and deployed a full-stack AI application integrating **ElevenLabs TTS for voice narration and Pollinations.ai for image generation** — 19 commits, live on Render + Vercel
- ▶ Built gamification system (XP, streaks, 18 achievement badges) and interactive map — demonstrates ability to ship and iterate quickly on AI-driven products.

EDUCATION

B.Tech Computer Science Engineering — CSMU Panvel | SGPA: 9.00 | CGPA: 7.37 | 2023–2027 (3rd Year)
Minor in Artificial Intelligence — Indian Institute of Technology (IIT), Ropar | CGPA: 7.23 | 2025–2026

ACHIEVEMENTS & CERTIFICATIONS

Hackathon Wins: 🏆 1st Prize — Nyaya AI (Legal AI chatbot) 🏆 2nd Prize — Vibecoding, Pillai Alegria 2026
🏆 3rd Prize — Intern India (AI matching engine)

Google Programs: Solution Challenge 2026 · Gen AI Academy APAC · Build with AI Bootcamp · Virtual PromptWars · Cloud AI Labs 2025

Certifications: Google Cloud Technical Series — AI in Action (Mar 2026) · Generative AI Mastermind — Outskill · Ethical Hacking Workshop & Masterclass · Solution Challenge · AI For Bharat
